SENT 23 March 2026, 11:05
SUBJECT Sector 10, farm owner stopping the trench crew

The trench crew was stopped this morning at Sector 10, between CH 5+300 and CH 5+600, by a farm owner who says he has no agreement with the Main Contractor for access across his land.

The crew has moved to the Sector 11 length and the two excavators are working there, so nothing is standing at the moment. The Sector 10 length cannot be completed until this is resolved.

Third-party land access along the route sits with the Main Contractor under Division of Responsibility row R-4. Could you please take it up with the landowner and let us know when we can return.

Regards, Project Manager Vexley Trenchless Services
